GROOVE SKY

SUSPENDED ACOUSTIC SYSTEM

Using the same genetic code as Groove we introduce Groove Sky which transforms into a grid-like suspended acoustic structure which can morph into any room it occupies.

Available in both 12mm and 24mm PET material Groove Sky is highly modular and can be assembled and suspended into an infinite amount of configurations to create inspiring geometric landscapes. Being so modular you can add to the already suspended structure when, and if, the need arises.

Trapping noise between the individual struts for an ideal sound trap Groove Sky can be made as dense and as sparse as you prefer. Given the openness of the system light fittings can drop through the gaps and you can build the system around any MEP protrusions.
