## SUSPENDED ACOUSTIC SYSTEM

Similar to molecular structures carrying genetic instruction for the development and functioning of all known organisms, our DNA is an evolutionary assembly of one essential shape that has endless construction possibilities to ensure no two arrangements are ever the same.

Whether it's down a stairway, floating above work stations or hovering above a reception area, the formations are absolutely endless. Available in 200mm or 300mm molecules, DNA can literally fit any space or ceiling void.
