LIGHTING

ACOUSTIC LIGHTING

Our highly functional acoustic lighting fuses contemporary design with practical function resulting in lighting that not only looks fantastic, but serves the purpose of helping reduce unwanted noise in any busy environment.

The benefit of all our acoustic lighting products is that if you do not wish to install as lighting, the products can be used without a lightbulb and function purely as room acoustics to help dampen the echo.

Get in touch with us to find an acoustic lighting solution that will fit your project.
