HIVE

SUSPENDED ACOUSTIC SYSTEM

Whether creating suspended homogeneous planes or multiple depths of field this geometrically inspired, modular system will entice the most creative curiosity into the design of large volumes of space where superior acoustic considerations are essential.

With the potential of customised horizontal volume and colour configurations the system can be integrated into pre or post design scenarios elevating ceiling design literally to another dimension.

In the evolution of architectural design, acoustics are now seamlessly woven into the DNA of HIVE offering an holistic solution within the realm of trendy modern design and development of spaces. With the addition of the hexagonal inserts which are available as solid elements or an array of patterned cut outs there is also the choice of how open or closed the system will be to suit the space requirements.

SPECIFICATIONS

PRODUCT SPECIFICATIONS

Composition: 12mm 100% Polyester Fibre
Recycled content: Minimum 45% PET plastics
Recyclability: 100% recyclable

PROCUREMENT

Procured in standard kit form as listed components below.

Components: 77 struts
123 connectors
6 hexagonal inserts
Coverage: Approx 11 sq metres

ACOUSTICS

Acoustic NRC Rating: E-87 NRC 0.75 (12mm material)
Calculated to BS EN
ISO 11654:1997

VOC EMISSIONS

VOC concentration: Low VOC product.
Product manufactured from 100% polyester fibres and no chemicals are used in manufacture of the material.

PET MATERIAL FIRE RATINGS

12mm - EN13501-1:2018: B-s1, d0

INSTALLATION

We recommend all 14six8 products to be installed by a preferred installer. Preferred installers can be supplied on request.

NB: Different pattern cut-outs in inserts and amount of inserts required are subject to price variation.
